

# BIOSURFACTANTS | 2019

INTERNATIONAL CONFERENCE | STUTT GART, GERMANY

SEPTEMBER 25-27, 2019

## **Prof. Dr. ir. Inge N.A. Van Bogaert**

### **Short CV**

Since 2015, Inge Van Bogaert is a Professor at the Faculty of Bioscience Engineering, Ghent University, Belgium and is a member of the Centre for Synthetic Biology where she is the group leader of the BioPort Team. She graduated from Ghent University with an MSc in Bioscience Engineering in 2004. In 2008 she obtained a PhD in Applied Biological Sciences on the Microbial Production of Sophorolipids, fulfilled at the Laboratory of Industrial Biotechnology and Biocatalysis (InBio.be) of Ghent University.

Prof. Dr. ir. Inge Van Bogaert is highly experienced in the synthesis of natural and new-to-nature bio-surfactants by microbial fermentation, with a focus on yeasts, shown by authorship of 58 international publications and six patents. Recently, she initiated a research line on the emerging topic of transport over biological membranes. Besides guiding PhD- and master-students on the above research topics, she is teaching bachelor and master courses in Belgium and abroad.
